Carrer Objective:

I am having 3.2 years of experience , **enthusiastic, eager to learn, punctual, determined, team player** and **hardworking** person looking for position as Software Test Engineer(SDET) ,that can help me in enhancing my skills, strengthening my knowledge, and realizing my potentiality. I wish to work in a dynamic organization where I can explore wide variety of opportunities that will contribute to my professional and personal growth while I can contribute to the growth of the company as well as engage in opportunities to further the company's goals.

Core Competencies:

1. Committed to continuous learning and staying up-to-date with industry best practices and emerging trends in software testing
2. Excellent problem-solving and analytical skills, with meticulous attention to detail
3. Strong communication and interpersonal skill and abilities, fostering effective teamwork .

Technical Competencies: 1) Python 2) Selenium 3) Pytest 4) Manual Testing 5) Agile Methodologies
6)JIRA 7) Api Testing 8) Robot Framework 9) jenkins

WORK EXPERIENCE

1) ASCENDEUM PRIVATE LIMITED (04.2023 – 06.2023)

Job Title : Automation TestEngineer

Project Profile:

- Domain : Api Testing, UI_Automation ,Selenium
- Type : WebApplication
- Role : Automation Test Engineer

Job Description: Basically AdTech company, and company created their own server, in that server there were running several number of jobs for several number of clients . Those each and every jobs were running based on the Automation script , it may be API or UI_Automation script and linked up with databases.

ROLES AND RESPONSIBILITIES

1. Worked in **cross-functional, agile project** teams to achieve quality standards throughout entire development process.
2. Customised implementations based on client needs and specifications to deliver desired outcomes and increase customer satisfaction levels.
3. Designing, implementing, executing and maintaining automation scripts with robust quality in a python based automated test framework.
- 4 .Proactively identifying areas of improvement in automation scripts, framework and developing new plans
- 5.Coordinated with front and back-end engineers to develop APIs and implement automated test script.

2) DIGIMETRIX TECHNOLOGIES PRIVATE LIMITED (09.2019-08.2022)

Job Title: Manual & Automation Test Engineer

JOB PROFILE:

- Domain : Web Automation , Api Teting, Manual Testing
- Type : Web Application
- Role : Automation Test Engineer

Job Description: It is basically web application. It its type of E-commerce application and working on Agile methodologies. It helps the customer to purchase anything from the application and payment through online in various mode and able to take the delivery of the product. As a test engineer I was involved to do integration , functional testing. Involved Automation Test script created

Roles and Responsibilities

1. Detected causes of test failures, adjusted testing parameters and scripts and reran tests to validate test outcomes against expected results.
2. Performed **manual testing** to detect defects and thorough checking with specific functional requirements
3. Proficient in designing and executing comprehensive test plans, test cases, and test scripts
4. Designing, implementing, executing and maintaining automation scripts with robust quality in a python based automated test framework.
5. Attached HTML report and created log fille for the testscripts
- 6.. Operated within **Agile methodology** for efficient project progress and have understanding like **Sprints, scrum , Defect Logging**
7. Execute the test cases through data driven framework with POM design pattern.
8. Have Worked on JIRA .

Job Title: Automation Test Engineer

JOB PROFILE:

- Domain : E-commerce
- Type : Web Application (Robot Framework)
- Role : Automation Test Engineer

Job Description: It is basically web based E-Commerce application which is attached with the Beverage and Food Firms. It is base on AI and ML based project where users can check revenue data percentage for future purpose.

Roles and Responsibilities

1. Detected causes of test failures, adjusted testing parameters and scripts and reran tests to validate test outcomes against expected results.
2. Performed **manual testing** to detect defects and thorough checking with specific functional requirements
3. Designing, implementing, executing and maintaining automation scripts with robust quality framework creation using **Robot framework**
4. Cross browser testing using pabot, and run different testcases in different browser .
5. Execute the test cases through resource file, csv file for data driven testing.
6. Execute the scripts based on **Robot framework and create Resource, Page object model and testcase folder to execute this**
7. Have Worked on JIRA .

Technical Skills:

Python:

- 1) Knowledge on file handling like.csvfile,textfile
- 2) Having knowledge on Python Data structure, comprehension,function and decorators
- 3) Knowledge on oops concept
- 4) Knowledge on Functions, decorators and Magic Methods
- 5) Having good knowledge in Collection and Regular Expression
- 6) Knowledge on connect with Database

SELENIUM

- 1) Having good experience in automating web-based applications
- 2) Expertise on Selenium WebDriver automation tool in Python platform
- 3) Expertise in identifying web elements using different types of locators
- 4) Good knowledge on Action class, Window Handles, Iframe, pop-ups
- 5) Implemented OOPS Concepts while using the Selenium Automation Framework
- 6) Hands on experince with pytest fixture, marker, html report
- 7) Good experience in working with PyTest Framework
- 8) Proficient on POM with Hybrid Framework

API TESTING :

- 1) Experience in testing RestAPI and API Automation
- 2) Good knowledge in HTTP request and Response parameter
- 3) Good knowledge in CRUD operations using Tool Postman with Python
- 4) Validated JSON formatted data, different status code like 200,201,401,400,500 etc.
- 5) Good exposure in Postman

MANUAL TESTING

- 1. Knowledge on SDLC and STLC, Bug Life Cycle
- 2. Having knowledge in Smoke Testing ,Functional Testing, Regression testing , integration Testing , system testing
- 3. Having Knowledge in writing test cases, test secnarios
- 4. Knowledge on log the defect issues through JIRA tool

SQL:

- 1. Knowledge on Retriving data through WHERE, HAVING ,GROUP BY,ORDER BY clause from the table
- 2. Knowledge on Different types of join.
- 3. Knowledge on different types of Opeartors, Data type, Constarints.
- 4. Knowledge on different sql commands(DDL, DML,TCL,DQL)

EDUCATIONAL QUALIFICATION:

| Course Name | College/University | Year of Passing | Percentage/ pointer | Total Marks/ Pointer |
|---|--|-----------------|------------------------|-------------------------|
| Bachelor Of Technology In Mechanical Engineering | Hooghly Engineering & Technology College. | 2019 | 7.98 | 10 |
| Diploma In Tool & Die Making | Central Tool Room and Training Centre | 2016 | 71 | 100 |
| Madhyamik/SSC/10th | Belur High School | 2011 | 74 | 100 |

Above Mentioned all details are true and best of my knowledge
